GENERAL CATALOGUE

2016

1 PRODUCT CONSULTATION

You are looking for a product. In this case, please mention the intended purpose and the parameters – and we will suggest the suitable products from our assortment.

Simply call
+ 49 2191 59217-0

2 PERSONAL CONTACT PERSON

You always want the same contact person. This is our approach as well. For this reason, we have provided a packet for the visiting card of your BS contact person. We are presenting our team with image on page 13. Here, you can simply tick your contact person.

5 QUICK WAYS TO BS!

As a castor professional we are at your service - please use our service in different ways:

5 BS PRODUCT SEARCH ONLINE

Do you want to find your product online? In this case, please use the guided product search on our web site. Or send us an email with your queries using the contact form or under info@bs-rolle.de.

This is the way to our web site:

3 PERSONAL VISIT

Let yourself be advised personally on site. Our field staff will visit you, and together with yourself he or she will find the suitable castor and wheel solution. For more information on our field staff, please refer to page 11.

4 BS WORLDWIDE

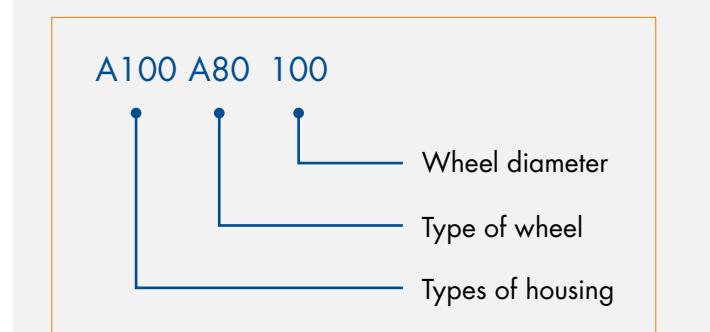

As an internationally acting company we are at home in many countries of the world. For more information, please refer to page 10.

Find our foreign representations here:

Fields of application for BS castors and wheels

Design of the wheels and castors is determined according to their specific application.
Generally speaking they are subdivided into the following fields:

- Furniture castors
- Apparatus castors
- Transport castors
- Heavy-duty castors

General Trading Terms and Conditions

§ 1 General – Scope of validity

1. The following General Trading Terms and Conditions are deemed to apply exclusively; any terms or conditions of the customer running counter to or deviating from our General Trading Terms and Conditions shall not be recognized by us unless we would have expressly agreed to their validity in writing. Our General Trading Terms and Conditions are also deemed to apply in the event of our having effected unconditional performance or delivery to the customer aware of such terms or conditions of the customer having run counter to or having deviated from our General Trading Terms and Conditions.

§ 5 Passing of risk – packaging costs

1. In the absence of anything to the contrary in the Confirmation of Order, delivery is deemed to be "Ex Works".
2. Special agreements are deemed to apply in respect of taking back packaging materials.
3. If so desired by the customer, we will arrange transport insurance coverage, in which case all costs thus incurred shall be borne by the customer.

claim even after such assignment. Our authority to collect the claim ourselves shall remain unaffected thereby. However, we undertake not to collect the claim as long as the customer meets his obligations of payment from the debts received, does not default in payment and – in particular – no insolvency petition has been filed or suspension of payments has occurred. If this is the case, however, we shall be entitled to demand the customer to notify us of the debts thus assigned together with their respective debtors, to furnish all information required for collecting the said debts, to hand over the relevant documents and to inform the debtors (third parties) of such assignment.

5. Processing or transformation of the purchased goods by the customer is always deemed to be done on our behalf. In the event of the purchased goods being processed with other items not belonging to us, we shall acquire co-ownership of any such new item in proportion of the value of the said purchased goods (final invoice amount including value added tax) to such other processed items at the time of such processing or transformation. In other respects, the same thing applies to the product resulting from processing or transformation as to that involving goods under retention of title.

6. In the event of the purchased goods having been inseparably mingled with other items not belonging to us, we are deemed to acquire co-ownership of such items in proportion of the value of the purchased goods (final invoice amount including value added tax) to the other items with which they have been inseparably mingled at the time intermingling took place. If the intermingling process results in the customer's item being regarded as the main item, it is then agreed that the customer transfers proportional co-ownership to us. In that case, the customer is deemed to preserve sole or co-ownership of the resulting product on our behalf.

7. For the purpose of securing our claims against the customer arising from the combination of the purchased goods with any real property, the customer shall also assign to us all claims resulting against any third party.

8. On demand made by the customer, we undertake to release the securities to which we are entitled insofar as the realizable value of our securities exceeds the claims due to be secured by more than 10 %; selection of any securities due to be released shall be incumbent upon us.

§ 6 Liability for defects

1. Warranty claims asserted by the customer presuppose that the customer has duly fulfilled his inspection and notification duties in pursuance of Section § 377 HGB.
2. In the event of the purchased goods revealing any defect, the customer shall, according to his own option, be entitled to request subsequent fulfillment in the form of remedy of the said defect or the supply of a new item free of defects. Where defects are remedied or a replacement is supplied, we undertake to bear all expenses necessary for subsequent performance, in particular transport, road charges, cost of labour and materials unless this incurs higher expense due to the purchased goods having been dispatched to another location than the place of performance.
3. In the event of subsequent performance failing, the customer shall, at his own option, be entitled to withdraw or to demand reduction of the purchase price.
4. We incur liability in accordance with the statutory provisions in the event of the customer asserting compensatory claims based on malice aforethought or gross negligence including malice aforethought or gross negligence on the part of our representatives or vicarious agents. If and where any delay in delivery is based on violation of contract for which we are deemed responsible, our liability to effect compensation shall be limited to foreseeable damage of a typical nature. Where no violation of contract with intent is imputable to us, any liability to effect compensation shall be limited to foreseeable damage of a typical nature.
5. We incur liability in accordance with the statutory provisions in the event of our culpably violating any essential contractual obligation; however, in this case too, any liability to effect compensation shall be limited to foreseeable damage of a typical nature.

§ 7 Legal venue – place of performance

1. If the customer's status is that of a merchant, the legal venue is deemed to be the domicile of our registered office; however, we shall be entitled to bring action against the customer at the court of his own domicile.

2. The Law of the Federal Republic of Germany is deemed to apply exclusively; application of the Uniform UN Purchase Law is ruled out.

3. In the absence of any provision to the contrary in our Confirmation of Order, the domicile of our registered office is deemed to be the place of performance.

§ 8 Joint and several liability

1. Any liability for damages other than that provided for in Clause 7 is ruled out, regardless of the legal nature of the claim. This applies in particular to claims for damages due to fault at the time of concluding the contract, other breaches of obligations or claims under tort for damages to property in pursuance of Section § 823 BGB.

2. Limitation in accordance with Clause 1 also applies where, instead of a claim for damages, the customer demands reimbursement of useless expenditure in lieu of performance.

3. As far as our own liability is ruled out or restricted, this is also deemed to apply to the personal liability of our employees, workers, representatives, agents and vicarious agents.

§ 9 Retention of title

1. We reserve retention of title to the purchased goods until all payments have been received from the contract of delivery. In the event of any violation of the contract on the part of the customer, in particular regarding default in payment, we shall be entitled to take back the purchased goods. Any taking back of the purchased goods is tantamount to our withdrawal from the contract. After taking back the purchased goods, we shall be authorized to sell the same; the proceeds obtained from such sale shall be credited against the customer's liabilities – less reasonable costs of realization.

2. The customer undertakes to handle the purchased goods with due care; in particular he undertakes to insure the same at his own expense against fire, water and theft at replacement value. In the event of maintenance and inspection work being required, the customer shall carry out such work in due time and at his own expense.

3. In the event of seizures or other third-party intervention occurring, the customer shall notify us immediately in writing in order for us to file suit in pursuance of Section § 771 of the Code of Civil Procedure (ZPO). In the event of the said third-party being unable to reimburse us for judicial and extrajudicial costs of a claim pursuant to Section § 771 (ZPO), the customer incurs liability towards us for the loss incurred.

4. Otherwise we shall be liable for each full week of delay within the context of a flatrate compensation amounting to 3 % of the delivery value but not exceeding a maximum of 15 % of the said delivery value.

5. The customer reserves the right to assert further statutory claims and rights.

The customer shall remain authorized to collect the said

Application

we are *moving* everything

**IF EVERYTHING RUNS
SMOOTHLY AT YOUR END,
WE HAVE DONE THE
RIGHT MOVES FOR YOU.**

If it is a matter of covering a distance from A to B, we will come up with a solution.

Castors, wheels, and everything that makes movement easier have been our passion for more than a quarter century. You will notice that when talking to us. In a team with you, we will seek the right individual solution for your requests. We know that a castor has to fulfil various tasks. It moves, carries, shall turn and stop, withstand heat or cold or shall look especially nice. We have them all. After all, we continuously work towards recognising and implementing new trends with a competence in technology which is typical for our family-owned enterprise from the German Bergisches Land region.

Let us be your partner – gladly from A to Z.

BS RÖLLEN®

JUST ORDERED, DISPATCHED IMMEDIATELY. OUR LOGISTICS MOTTO IS TO DELIVER OUR PRODUCTS TO YOU AS QUICKLY AS POSSIBLE.

> **Logistics** Affectionately we call our logistics centre also roll-out centre. After all, everything that is deposited on 3,000 sqm in our high-bay warehouse system usually rolls out of our company with lightning speed. Many parts of our assortment will arrive at your place tomorrow, if you order today. Lean and simply our customers are linked to us by EDP – the status from order processing to delivery can be traced entirely.

With our BS modular system we react to your individual requests and special needs as quick as lightning. You have a special project? In this case, we develop for you according to your requirements, the design, drawing, technical realisation in 2D and 3D, prepare prototypes, carry out the test phase and after production maturity we will manufacture for you.

A GOOD COOPERATION! THIS IS OUR CONCEPT OF CUSTOMER RELATIONSHIP.

> Customer relationship We have a personal penchant: that is you! Partnership cannot be lived from afar, but only by direct contact from human to human and hand in hand. For this reason we want to get to know our customers, want to internalize your requests, want to implement your suggestions, want to develop special solutions to solve problems. When everything works out well, and when it gets difficult sometimes, we are at your service personally as a partner and find the best solution – together with your contact partner who knows you for many years. This is important to us: Constancy and dynamics is synonymous for the BS team.

SUBSCRIBE NOW! OUR NEWSLETTER WILL ALWAYS INFORM YOU OF EVERYTHING YOU SHOULD KNOW.

> Newsletter Profit of the fact that (almost) 365 days a year everything in our company revolves around castors. New ideas, new techniques, new materials – like the triumphal procession of thermoplastic rubber at present – and new ideas: we are pleased to pass them on to you. Short and sweet, our newsletter will give you an overview of what will move you in the future.

Register now to receive
the next newsletter
immediately:

www.bs-rolle.de/newsletter

All contents of newsletters are in the archive for you to read. Use the "castor library" to look up special subjects, and to find out more about castors, wheels, transport units and materials handling technology from a technical point of view.

SUPPLIERS' AWARD FOR BS ROLLEN!

BREAKING DOWN COMPLEX MATTERS FOR THE CUSTOMERS – POS WITH CONTROL SYSTEM.

> **Shop systems / customer loyalty** System with thought-out design. This is the service our intelligent shop system has to offer to the specialist trade. The fully-developed presentation of castors and wheels supports local sales staff. Thus, you have no staff commitment to the product group – your sales persons are relieved. By means of multiple direction using from header signs to detailed product and operational information, the customer aimfully guided to the sales transaction. This makes our shop system the perfect salesperson.

Choose products and placement tailor-made for your customers and for your market, and we will set up your individual castor and wheel shop. Selling cannot be any easier.

> **Suppliers' award** You can count on that: We belong to the best suppliers! The crystal-clear award is the appreciation of our work for decades. It documents our customer orientation and customer satisfaction. We are proud of that. The award does not allow us to rest, it is rather more a great motivation to continue straight ahead on the chosen path, and to continue to extend the partnership with our customers for the future.

The perfect sales consultant:

- Picture and EAN code
- Detailed dimensions
- Product information

BEYOND THE BORDERS OF EUROPE

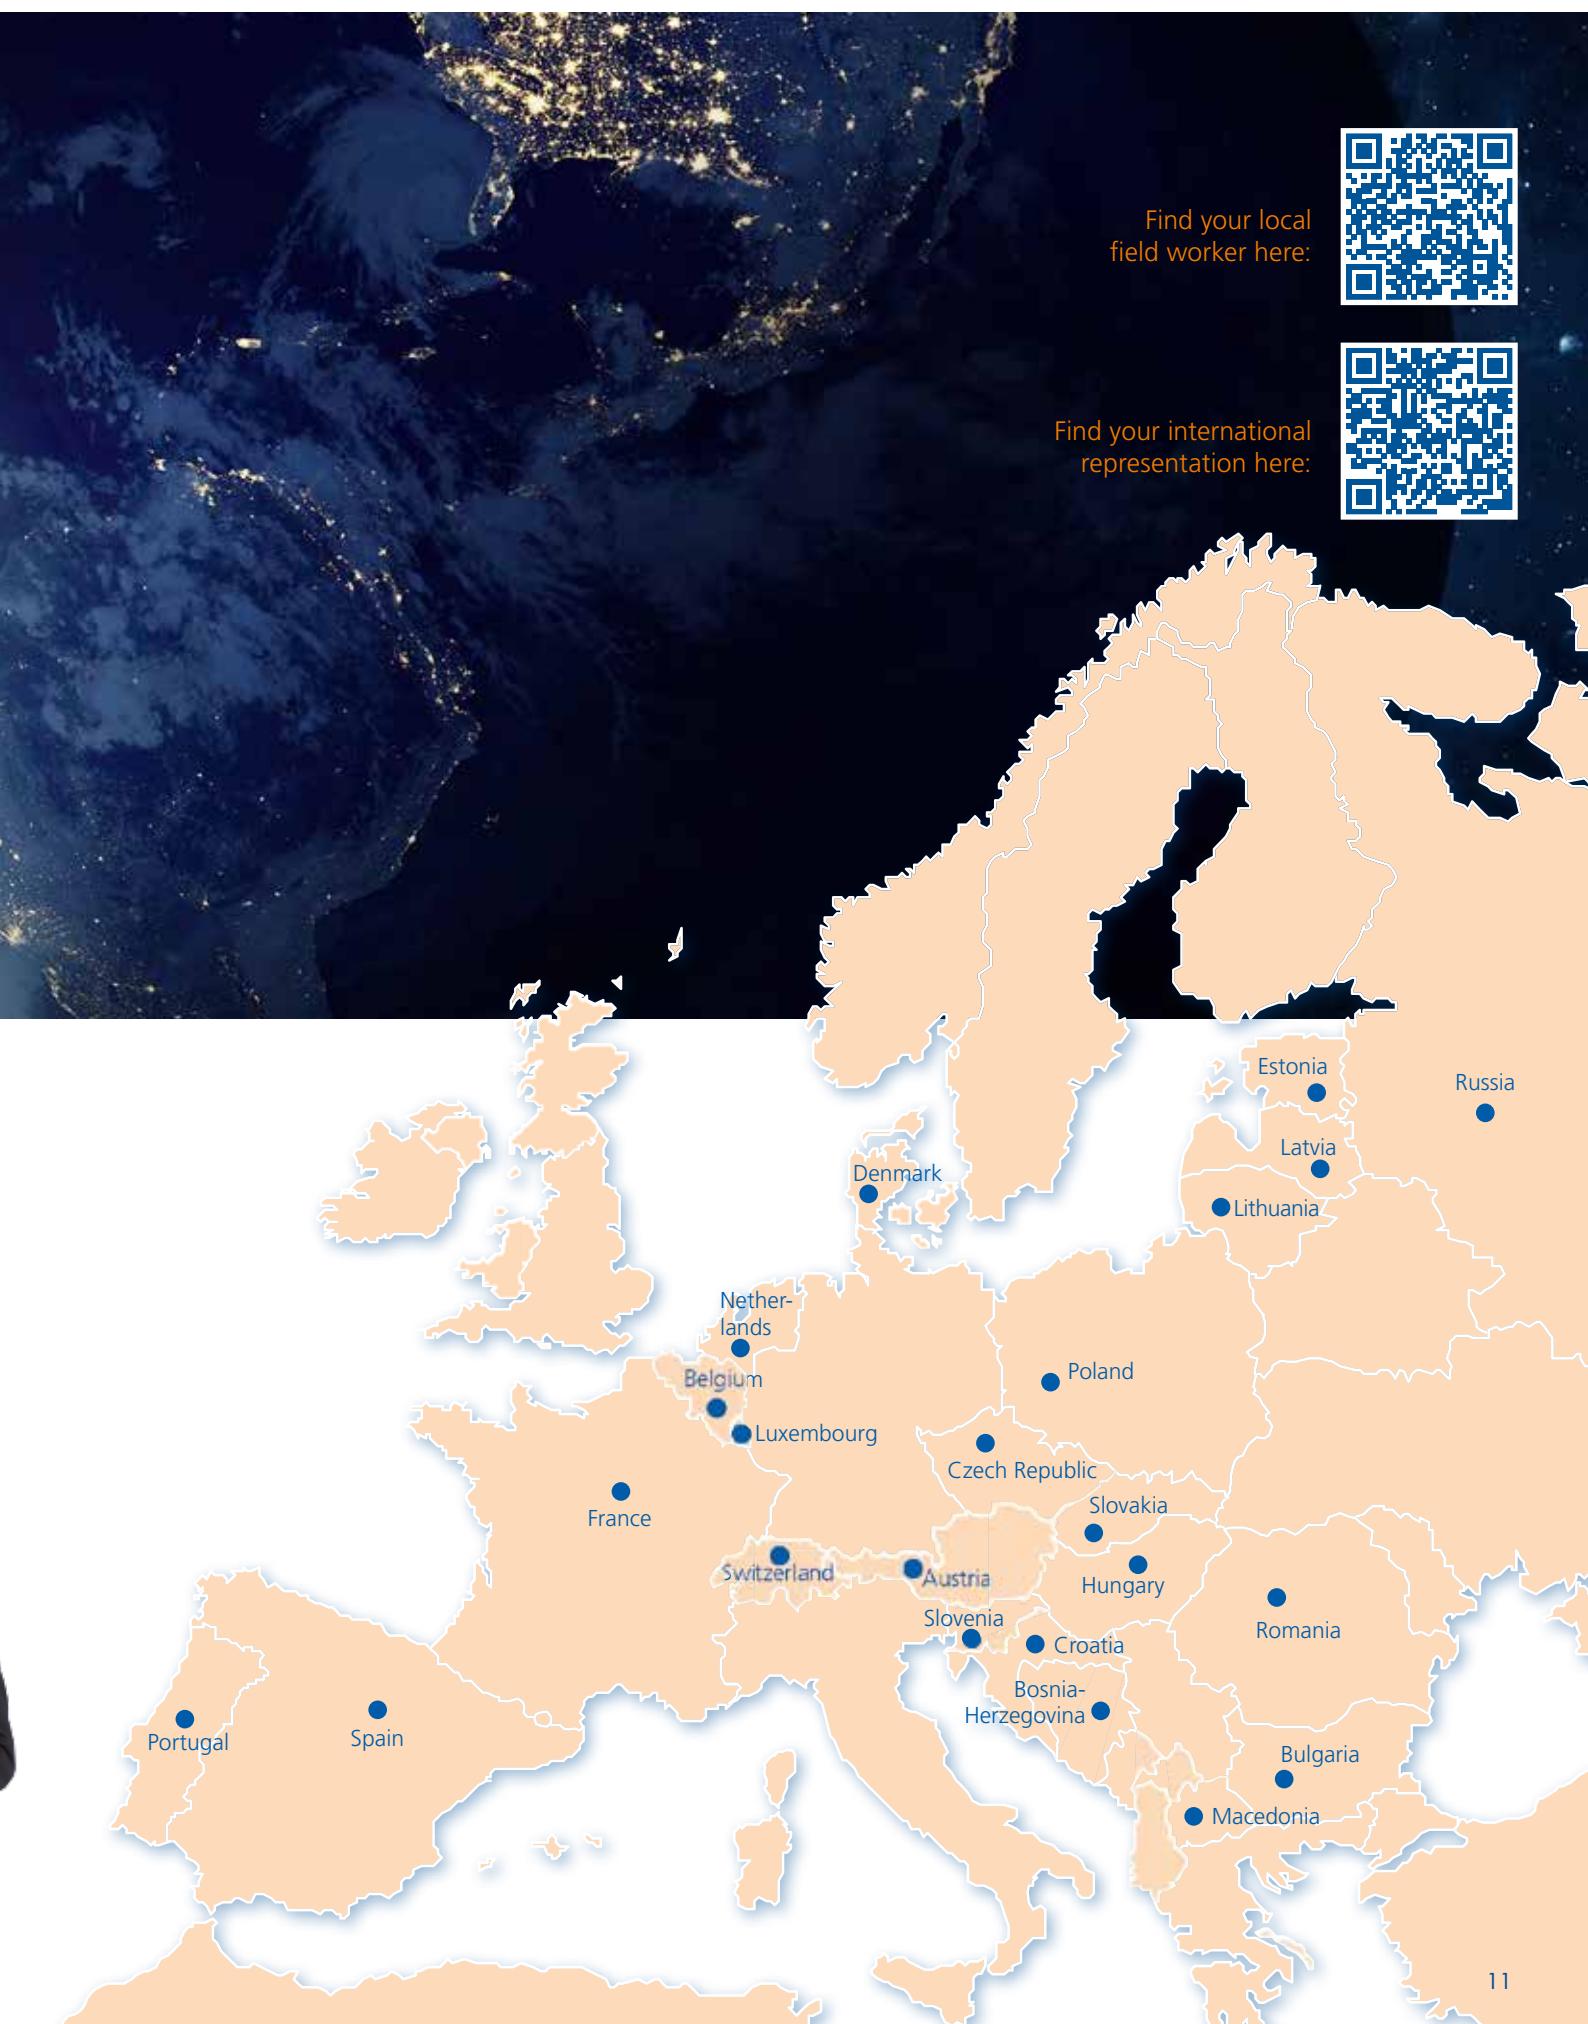

> Local national and international field workers:

Intensive support – that characterises BS Rollen. Our customers in Germany and in all other countries, in which we are active, can count on that. With eight company field sales workers we are out and about in sixteen German federal states and advise our customers where it matters most: on site.

In almost all European countries, we are represented by agencies or sales partners, and advise you in your national language, of course. For this reason, the intensity and quality of BS services is always the same. This ideal project support is appreciated by our customers as well, who have establishments in several countries. In the whole of Europe, our tight sales network ensures constant assistance and the distribution warehouses in the European countries offer our 24-hour delivery service.

Our catalogue and our website are available in nine languages. Thus, you definitely have the shortest routes to BS Rollen in the whole of Europe.

WITH BS ROLLEN TOWARDS *FUTURE*

> **BS as an employer** Continuity and dynamics are the two poles that unite the team of BS Rollen. This mixture is the key for the longstanding partnership between employees and customers. As a family-owned enterprise we attach importance to the longstanding relationship of our employees – of which there are some who have been with BS Rollen since establishment. The specialist competence and experience is a property which our customers appreciate.

A dynamic attitude to product, market and persons are part of BS, as well, however. For this reason, training and further education measures of different manifestations have a high significance for us – not only for the optimization of the processes in keeping with DIN EN ISO. In regular intervals and according to the latest knowledge, our staff attend professional, technical, process-oriented or strategic further training courses. Thus, we offer long-term professional perspectives at BS.

The training of young people is another important field in personnel development in Germany. Here we focus on the commercial field and on warehouse logistics. In this field, our aim is always the integration of the younger generation in the BS team. With a good team, we actively roll towards the future of growing requirements.

**FRAGILE –
HANDLE
WITH CARE**

**MATERIALS-
HANDLING
TECHNOLOGY**

TRANSPORT SEASON BEYOND EASTER.

> **Materials-handling technology** For 365 days a year the sensitive freight in the distinctive oval shape slides gently over PVC or rubber-coated castors of materials-handling technology – like many other products, the manufacturing process is linked in production. Production lines optimize in-company costs and ensure quick throughput. As OEM for load-bearing and ball castors, BS will plan your plant, will take into consideration the product and the requirements on site so that everything can run smoothly. We provide most common types in 24-hour service – you can rely on that permanently. Small conveying solution required? Our rolling racks are popular mobile helpers in material supply systems.

No wonder, they are used by many "lazybones".

Go to page 148 for more.

By means of roller tracks for shelf systems, products can be moved manually without effort – not only in pharmacies, but also in the entire logistics sector.

DRUM-ROLLS FOR BS

FACTS

- Ø 58 to 400 mm
- 50 kg to 1.25 tons

TRANSPORT CASTORS

WE PLAY A PROMINENT ROLE DURING EVERY CONCERT!

> **Transport castors** When an entire branch swears by a role, BS might be behind this.

In the music branch, "Blue Wheels" can be found in almost every case. The elastic tyres are robust, quiet and absolutely traceless. But, other branches have their favourites as well.

Wherever provisions are stringent, especially in the food-processing and chemistry industry, all rolling components are frequently made of stainless steel. In bakeries, the heat-resistant roller containers are brought from the cold store directly into the oven for baking. And branches with valuable or fragile goods, such as HiFi or glass, rely on our different drums and special easy-running castors. In order to meet the rising demands, we continue to develop our materials further. What was just rolling along yesterday, rolls more comfortably, softer or faster today.

Tell us what you want to roll. Our service department will advise you which combinations of castor, drums, bearing, etcetera are the right ones for you. Quickly and free of doubt!

Go to page 104 for more.

AT YOUR
SERVICE

SMALL TRANSPORTS ON 5-STAR LEVEL.

> **Transport devices** These are the little things that give great pleasure. This does not always mean luxury as in top-class hotels, the castors of the luggage trolleys of which we also gold coat upon request.

2-in-1 is the new added value. With the double function of transporting and rising up, the mobile all-purpose ladder / trolley opens up a new dimension in the truest sense of the word.

Our helpers can easily lift, roll and wrap flowers, furniture or plates. They are not only uncomplicated in use, but are an important factor for health, because they relieve the back primarily.

By the way: The design of the skateboard has inspired us to develop our new Profi roller. The result – a marvellously soft rolling comfort trolley.

Go to page 198 for more.

WHEN DESIGN BECOMES THE LOAD-BEARING ELEMENT

> **Design castors** It is not a matter of the castor, that rolls, by a long way only. In furniture, display and shop fitting especially, design castors are a statement. They are part of the piece of furniture or even are the dominating design element. Skater wheels have a solid basis in the field of Young Living. Castors in different colours are used mono-chrome or contrasting. The nostalgic ball castors from the 60ies are enjoying a real revival in times of retro and vintage. "Less is more", said the architect Ludwig Mies van der Rohe already. Our castors without rim follow this aesthetic approach: With the new ball-cage technology they do not only enthuse followers of minimalism.

At BS design is not surface-dependent. All design and furniture castors are available with hard and soft running surfaces, of course.

Good design also needs perfect function. Thus, our office chair castors are braked load-regulated. We offer intelligent solutions for the connection of our castors to the piece of furniture as well as rotating collars, when it comes to the own axis. It is all about the unit of shape and function.

Go to page 66 for more.

FURNITURE/ DESIGN CASTORS

QUALITY – THE NATURAL CLAIM OF OUR SERVICE.

> Quality We don't need to talk about that, quality is a natural feature. For this reason, BS Rollen has of course been certified for many years in the fields of design, development, production, sale and distribution, currently in conformity with DIN EN ISO 9001:2008. Our involvement for our customers is the basic value for our actions. Our demand for quality is thus a central part of our customer relationship.

In our product development, material research and verification of technically relevant products in conformity with DIN EN 12527 – DIN EN 12533, we cooperated with the Technical College of Bielefeld, if and when necessary. The College carries out partial analyses in conformity with German standards DIN EN 1004 and DIN EN 840.

Not only doing everything to keep our quality standards, we are continuously working to improve them further. Convincing products create convinced customers. That is what keeps us moving.

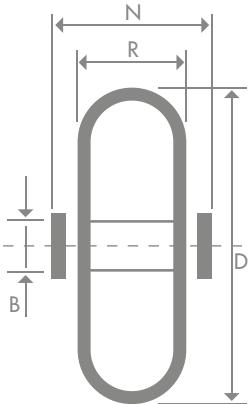

TECHNICAL ADVISER

Technical explanations . Calculation formulas . Product use

Abbreviations and dimensions of wheels and castors

A = offset

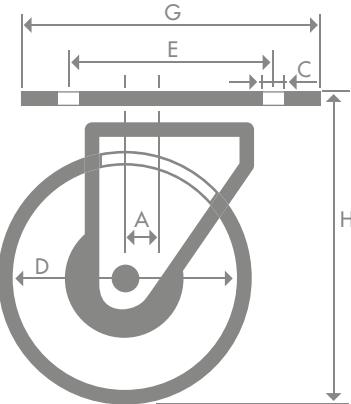

B = bore/axle diameter

C = screwhole diameter

D = wheel diameter

E = screwhole distance

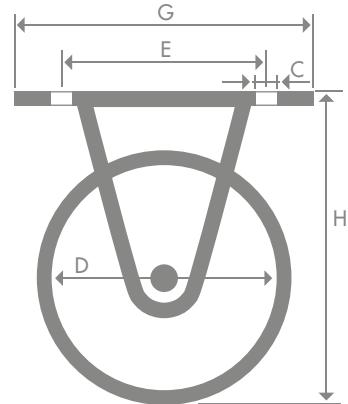

G = plate size

H = overall height

N = hub length

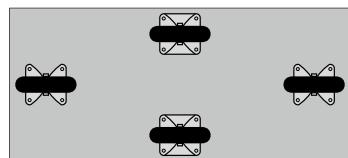

R = wheel width

Manoeuvrability

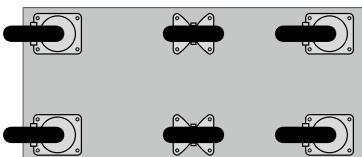

Four swivel castors,
can be provided with
directional lock if required

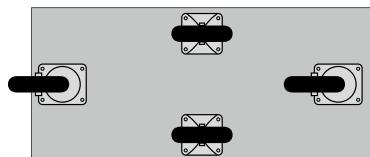

Four fixed castors,
the middle fixed castors
have a little more overall height

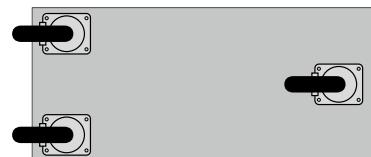

Two fixed, two swivel castors

Four swivel, two fixed castors

Two swivel, two fixed castors

Three swivel castors

■ Wheels

hard floor = soft tread

soft floor = hard tread

■ Load capacity

Load capacity

=

$$\frac{\text{Weight of carrier} + \text{additional load}}{3}$$

According to DIN 8455 (ISO-Norm) the nominal load bearing capacity applies at speed of 4 km/h on a level surface and a surrounding temperature of +15° C bis +28° C, as well as a height of barricade < 5 % of the wheel diameter.

■ Wheel bearings

Roller bearings

Roll resistance relatively small, tough, robust, largely maintenance free

Ball bearings

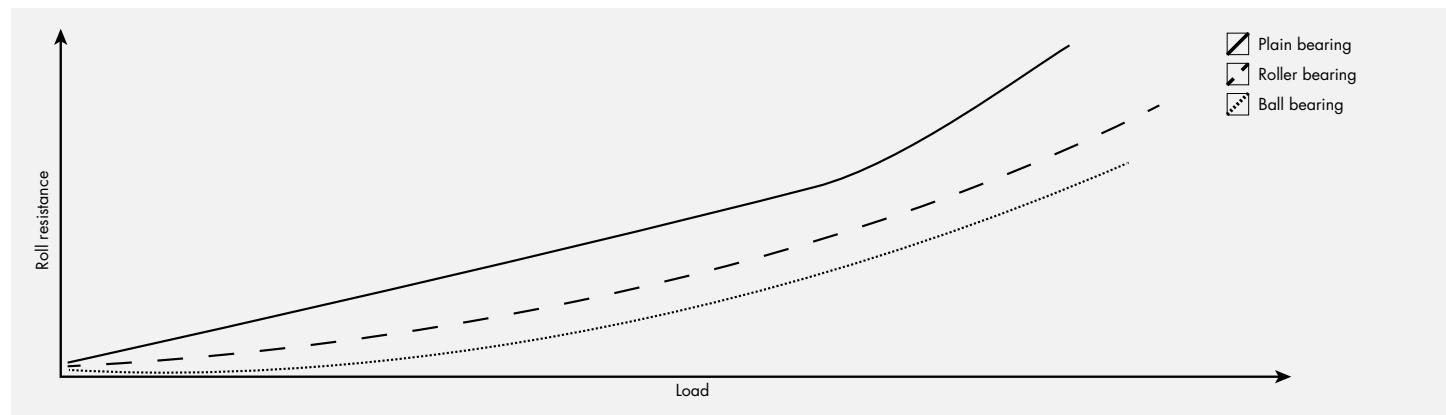

Fulfill the highest demand on load bearing and roll resistance. Particularly suited for heavy duty castors

Plain bearings

Suitable for sporadic use or wet conditions, least expensive type of bearings, corrosion resistant

■ Start and rolling resistance with different bearing types

■ Wheel and tyre types

Polyamide/ Polypropylene

- high load capacity
- break proof and maintenance free
- largely resistant to salts, fats, acids and leaches
- non-marking
- highly abrasion proof

Cast iron

- high load capacity
- abrasion proof
- resistant to metal shavings and aggressive materials

Solid rubber

- low noise running
- easy on floors
- shock proof
- dampens vibrations

Elastic solid rubber

- highly resilient
- easy on floors
- extremely abrasion proof
- excellent running and operating comfort

Polyurethane

- highly resilient
- robust and abrasion proof
- elastic, low noise running
- largely resistant to oils, fats, petrol and chemicals
- non-marking

Pneumatic

- good shock absorbers
- low roll resistance on bad floor surfaces
- easy on floors

Santoprene

- highly resilient
- robust and abrasion proof
- extremely low noise running

TPE

(thermoplastic rubber)

- high riding comfort
- low noise running
- low roll resistance
- non-marking, but this material is containing oil and could cause contact discolouration on sensitive floors

TPU

(thermoplastic polyurethane)

- robust and abrasion proof
- contact discolouration free
- easy on floors
- low noise running
- largely resistant to oils, fats, petrol and chemicals
- elastic

Vulkollan

- very high load capacity
- extremely abrasion proof
- easy on floors
- low noise running
- high riding comfort

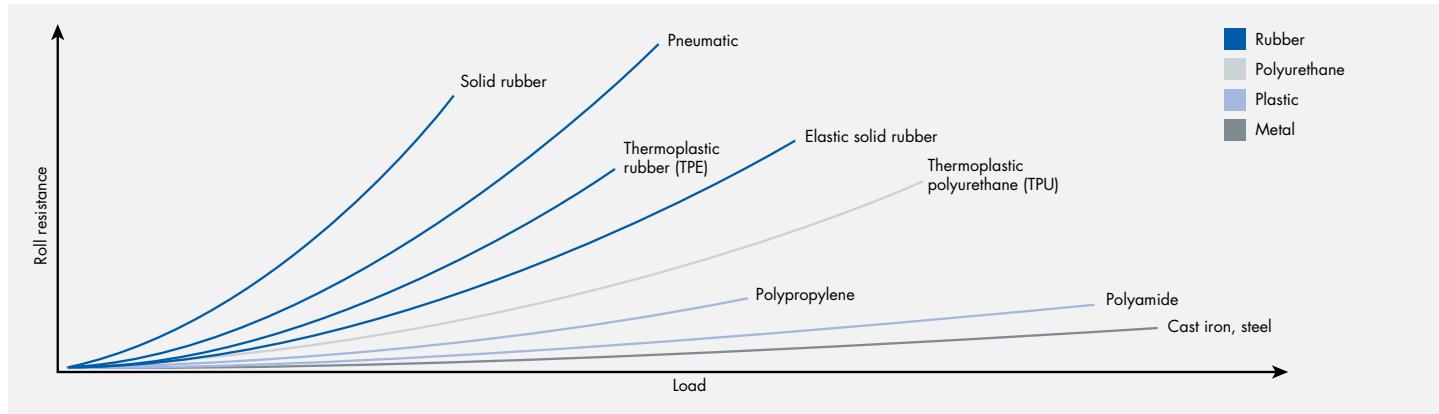

Puncture-proof wheels (polyurethane tyres)

- abrasion proof
- shock and noise reduction
- long life
- maintenance free
- high load capacity
- not suitable for permanent load

Cross section of a puncture-proof wheel

Start and rolling resistance using different tyre materials

Brakes

Wheel brake

Wheel turning blockage

Total brake

Blockage of fork head and wheel

Total rear brake

Blockage of fork head and wheel

Central lock

Centrally switched blockage

Directional lock

Blockage of turning movement

Fittings

Bolt hole

For penetration by screws facilitating attachment to metal or wood constructions (\varnothing 8, 10, 12 mm)

Threaded stem

For screwing onto metal/wood constructions (M8, M10, M12)

Plate

For screwing onto metal/wood constructions

Peg for polyamide sleeve

For round and square piping and wooden constructions

Stem

For stable attachment in pipes/tubes

Splayed bush attachment for pipes/tubes

Wheels /castors are not being correctly used when ...

- they are subject to loads exceeding the maximum load capacity given in the manufacturers' technical specifications;
- they're used on an unsuitable terrain;
- surrounding temperatures are too high or too low;
- equipment with blocked wheels or rollers is moved;
- fixed castors are moved at right angles to the rolling direction;
- particularly aggressive materials are allowed access;
- subject to inappropriate lateral or vertical knocks or blows;
- foreign bodies get into/onto the running surface;
- subject to high speeds;
- alterations, not agreed on with the manufacturers, are carried out;
- a soft running surface on soft terrain or a hard running surface on hard terrain is used.

Product liability information

1. Product information and operational guidelines

Wheels and castors are defined as component parts which are interchangeable on their intended equipment, furniture, transport systems or other similar products for the purpose of making them mobile.

This product information refers to wheels and castors, particularly passive swivel castors, for non-motorized vehicles and equipment (also referred to as "the object") which are normally not moved at any speeds exceeding walking pace.

Wheels and castors thus defined can be allotted to the following task areas:

Home

- e.g. seating or living room furniture

Service areas

- general service furniture
 - e.g. shopping trolleys/carts, office machinery

Hospitals

- e.g. hospital beds

Industry

- e.g. light, medium and heavy duty transport equipment

Expert assembly is of paramount importance for correct use of the products:

- a) The product must be firmly attached to the object at all the relevant prescribed points.
- b) The object must possess sufficient firmness at these points.
- c) The product's function may not be impaired or changed by assembly/attachment.
- d) Swivel castors must be attached in such a way that ensures vertical axle positions.
- e) Fixed castors must be attached so that the wheel axles are aligned with each other.
- f) An object may only be fitted with identical swivel castors. If fixed castors are also to be attached, only those recommended by the manufacturers may be used.

Special models must be specified for damp areas, areas subject to direct weather conditions or close to the sea, or for operation in aggressive, corrosive surroundings.

Special models must also be specified for operational temperatures below 5° C and over 30° C. Under no circumstances may standard products be employed with the nominal load in such conditions.

Wheels/castors, housing, blocking system and axle attachments form a functional unit. Liability applies only to original products.

All possible load or strain conditions must be taken into account when choosing wheels/castors. They must otherwise be covered by additional security supplements.

2. Misuse

Misuse, or non-adherence to the prescribed correct use of wheels and castors, applies for example, when:

- 2.1 they are subject to higher loads than the max. load capacity laid down in the catalogue.
- 2.2 they're used on unsuitable, uneven floor surfaces.
- 2.3 surrounding temperatures are too high or too low.
- 2.4 equipment with blocked wheels is moved forcibly.
- 2.5 particularly aggressive media are allowed to act.
- 2.6 unprescribed blows or overloading occur.
- 2.7 foreign bodies are allowed to penetrate the tyres or wheel/castor surfaces.
- 2.8 they are subject to excessive speeds.
- 2.9 alterations are made that were not cleared with the manufacturers.

3. Product capacity

Product capacity demands not defined in our catalogues, brochures or capacity descriptions must be cleared with us.

The pertinent DIN, ISO and CEN norms as well as the RAL-RG 607/10 merchandise guidelines are of particular relevance here.

4. Product maintenance

Wheels and castors must be regularly serviced according to their requirements

- greasing the bearings
- adjustments to loose connections

Only cleaning agents free of corrosion aiding or damaging ingredients may be used.

Wheels/castors or components must be replaced as soon as malfunction becomes evident.

Aggressive cleaning agents or untreated natural soil may promote staining. Thermoplastic rubber treads contain oil, which can result in contact discoloration on sensitive or untreated surfaces. Our staff will gladly advise you on this issue.

5. Informational and instructional requirements

In order to fulfill information, instructional and maintenance requirements according to product liability laws the following must be made available:

- for trading and service:
catalogues and user instructions
- for end-users:
product and user information

For the ensurement of function of wheels and castors

- the trading is called upon to observe this product information (points 1 – 5) the user information and, if required, to order it from the manufacturer and pass it on to service personnel.
- service personnel is called upon to observe this product information (points 1 – 5) the user information and, if required, to order it from the manufacturer and pass it on to the end-user.

Steering blocker can be screwed on and is unattached on delivery.	ALZ.K
---	-------

Remark: The combination is only possible with swivel housings and without brake, plate size: 104 x 80 mm.

Description

Fork of sheet steel
zinc-chromated
dual-row ball bearings collar in fork head

Model

- Swivel castor
- Fixed castor
- Swivel castor with total brake

Tread
Black rubber

Wheel body
Plastic (end number .081 with thread guards)

Bearing
Plain bearing

Tread
Black rubber

Wheel body
Plastic

Bearing
Roller bearing

MATERIAL-HANDLING TECHNOLOGY

Roller racks . Ball transfer units . Roller fitting strips . Conveyor rollers . Roller tracks ■

Roller stands for material supply

 100 - 200 kg

Kombi roller stand

- material stand with dual foot construction
- galvanised steel conveyor stand, Ø 60 mm, 1.5 mm plate
- ball track with 8 balls
- sliding height adjustment
- foldable

	Roller width kg	min./ max. mm	Dimensions L x B mm	
	200*	350	758/1197	ROLLST..KOMBI

Ball roller stand

- material stand with dual foot construction
- welded steel construction
- 3 tracks, each with 8 balls
- space saving foldability
- level regulation for uneven floors

200*	707/1128	560/350		ROLLST..KUGELTI.
------	----------	---------	--	------------------

Conveyor roller stand

- Material stand with tripod construction
- Plug-in system for feet
- galvanised steel conveyor roller, 50 mm Ø, 1.5 mm steel plate
- sliding height adjustment
- adjustable with or without stopper

100*	350	630 / 1100		ROLLST..350
100*	500	630 / 1100		ROLLST..500
100*	600	630 / 1100		ROLLST..600

Remark: * Surface load over the complete surface area.

Roller stands for material supply

	Roller width kg	min./ max. mm
--	--------------------	---------------------

100*	430	630 / 1100	ROLLST.K
------	-----	------------	----------

 100 kg

Ball track roller stand

- 430 mm ball track, with 8 galvanised steel balls, 15 mm Ø
- Material stand with tripod construction
- Plug-in system for feet
- sliding height adjustment

100*	350	630 / 1100	ROLLST.A
------	-----	------------	----------

Multi-directional roller stand

- 350 mm multi-directional roller track, with 17 plastic 50 mm Ø m-d rollers
- tripod stand construction
- Plug-in system for feet
- sliding height adjustment

100*	200	670 / 1100	ROLLST.V
------	-----	------------	----------

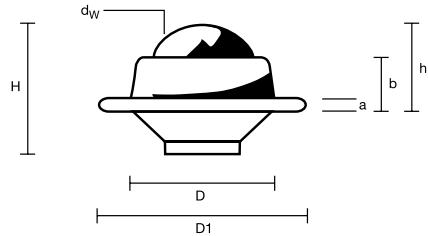

V-form roller stand

- Material stand with tripod construction
- Plug-in system for feet
- galvanised steel conveyor roller, 50 mm Ø, 1.5 mm plate, 200 mm long
- sliding height adjustment

Remark: * Surface load over the complete surface area.

Roller tracks

Mini roller tracks

Roller tracks are used mainly for the safe movement of transport boxes and cartons in flow racking. The rollers are made of premium quality, robust, impact resistant thermoplastic. It absorbs no damp and is resistant to acids and leaches. These rollers, on steel axles, are available as standard or as flanged rollers.

The roller track frame is cold formed zinc plated steel, 0.75 mm thick.

The roller separation distances (33, 50...) stated in the catalogue are approximated. The exact hole pitch is 16.667 mm +/- 0.1 mm.

180 - 550 kg

Flow shelf with picking tray

Flow shelf
with roller tracks
and guide rails

Description

- Solid roller tracks with steel axles, rollers Ø 28 mm
- Galvanised and sturdy profiles
- Use in the temperature range from -35 °C up to +50 °C
- Simple, tool-free installation (plug-in system), modular construction expandable
- Container and cardboard boxes up to 22 kg (30 kg with reinforcement)
- Roller tracks and guide rails adjustable 10 mm each
- Minimum container/carton width 80 mm

Installation example for cardboard boxes

Installation example for plastic boxes

Remark: Accessories like metal brake sheets or brake clips upon request

Flow shelf

Installation example and information on flow shelves

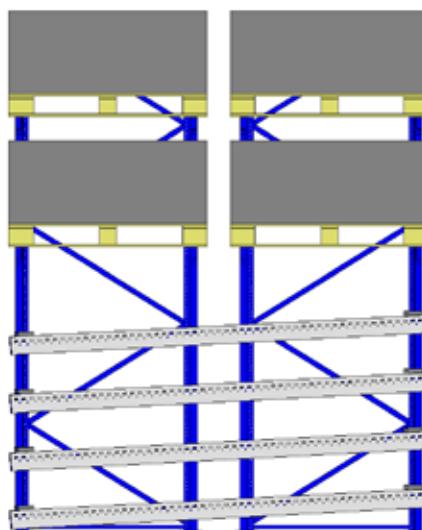

Flow shelves can be mounted in almost every existing or new pallet rack with the included adapter bracket. Flow shelves are usually installed in single- and double-deep pallet racks. This leads to the standard depths of 1250 - 2450 mm.

Installation example in pallet racks:

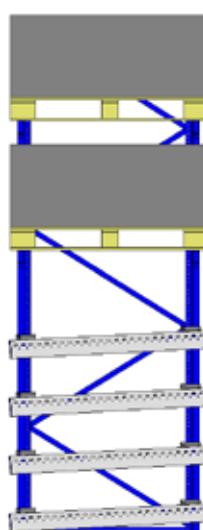

Flow shelf, straight version

- The flow shelves are suitable for all post profiles with double hole grid on the front side due to use of the adapter brackets. Furthermore, the back sides of the post profiles must be open.
- The installation height is adjustable in 25 mm increments. Low height.
- Sturdy and solid flow shelf design.
- Temperature range +50 °C to -35°C
- Adjustment of inclination from 0 – 10 % (standard inclination is 6 %)

Roller tracks

Multi-directional roller tracks

Multi-directional rollers are employed wherever bundles, packages, cartons, boxes or work pieces are turned, sorted, re-directed, commissioned or otherwise moved around. Dimensions and weight of the goods determines the separation distances of rollers and tracks.

Goods should not exceed the following individual weights:

- Ø 50 mm: 100 daN (kg)
- Ø 60 mm: 200 daN (kg)
- Ø 80 mm: 400 daN (kg)

The rollers can be used at temperatures of -15 °C until +80 °C.

The roller separation distances (66, 100...) stated in the catalogue are approximated. The exact hole pitch is 33.33 mm.

Separation distance mm	Wheel Ø 50 mm	Wheel Ø 60 mm	Wheel Ø 80 mm
66	410.000	411.000	
100	410.001	411.001	412.001
133	410.002	411.002	412.002
166	410.003	411.003	412.003
End stop	410.004	411.004	412.004
Single roller	360.001	360.002	360.003

Available alternative:
50 mm rollers can also
be supplied in single track form

**Multi-directional
roller tracks**

Roller tracks

Roller tracks

For example roller tracks are used for:

- flow racks
- guide tracks
- rollerways connecting two work places
- packing machines
- drive belt guides

We normally supply your desired fixed length. The frame is zinc plated, $V_W = 2.2 \text{ cm}^3$. When not otherwise ordered, standard rollers are mounted in the lower row of holes whereas flanged rollers are always mounted in the upper row of holes.

**Roller tracks with standard plastic rollers
Diameter 48 mm**

Plastic rollers (48 mm) without a flange have a load capacity of 10 daN (kg).

Flexible roller conveyors

Flexible roller conveyors

- Axle distance 55 - 130 mm according to the extended length
- Plastic pipe transport rollers Ø 50 x 2,8 mm, with ball bearings

Variation:

- Galvanised steel transport rollers Ø 50 x 1,5 mm, with ball bearings (please ask)

Flexible roller conveyors and flexible mini-roller conveyors

Flexible roller conveyors are independent, flexible conveyors for changing transport directions and destinations.

They feature:

- variable transport lengths (extendable)
- height adjustability (700 - 1100 mm)
- mobility by means of castors with brakes
- Their routing flexibility easily allows curve making

Headroom: standard height 700 - 1100 mm adjustable. Alternative heights on request.

Ball transfer tables

- Ball transfer tables are for direction changes in a conveyor section, or for turning and general moving of packages, eg. at workplaces.
- Transported goods are only supported by the roller balls and need to have flat, hard, stable and clean bases.
- The smallest article must lie on at least 3 of the roller ball lines.
(ball distances x 3 = minimum length and width)
- Individual roller balls Ø 15 mm have a load capacity of 50 kg.
The ball tables offered here have a package load capacity of up to 40 kg.
- Tables with ball sizes Ø 22 mm can carry heavier loads. Please supply us with the intended weights.

Ball transfer tables can also be supplied in alternative lengths, widths and ball distances/intervals. Please supply us with your required measurements and load capacities.

Multi-directional mini-roller conveyors with mini-rollers-Ø 48mm

Multi-directional mini-roller conveyor

- Multi-directional mini-roller conveyors are for direction changes in a conveyor section, or for turning and general moving of packages, e.g. at workplaces.
- Transported goods need to have flat, hard, stable, clean and dry bases.
The goods must be at least 200 mm wide.
- The smallest item must rest on at least 3 mini-rollers.
(axle distance x 3 = minimum length)
- Multi-directional mini-roller conveyors are normally operated in combination with light roller and mini-roller conveyors. The construction and load capacity is compatible with these conveyor types.

Multi-directional mini-roller conveyors can also be supplied in alternative lengths.

* Please note: If axle distance is 75 mm we deliver: instead of 1000 mm - 975 mm length; instead of 2000 mm - 1950 mm length. Supports and accessories please see on page 191.

Small roller conveyors with support rollers Ø 20 mm

Small roller conveyors

- For transporting/conveying small, light goods.
- Dimensions of the smallest goods: minimum 75 mm at an axle interval of 25 mm/min. 100 mm at an axle interval of 33 mm.
- The goods must rest on a minimum of 3 supporting rollers.
- The goods' base must be flat.
- The conveyor track must always be wider than the goods.
- A number of conveyors can be combined to form longer lengths (special lengths possible). The supports intervals should not be more than 2 m. If a number of elements are combined supports must be positioned beneath the connecting parts.
- For operation in dry interior areas.
- The load capacity depends on the track width, roller distances and support intervals.

You can plan the conveyors according to your requirements.
 Small roller conveyors can be delivered according to your individual local specifications.

Frame:

Galvanised steel
 20/70/20 x 2 mm U-form
 with screwed cross bars.

Support rollers:

Blue plastic pipe Ø 20 x
 1.5 mm with ball bearings

Curves:

- Interior radius 800 mm
- Support rollers continuous or in multi-split mode.
- Width 200 - 300 mm continuous
- Width 400 mm in 2 elements
- Width 500 mm in 3 elements

Frame:

Galvanised steel
 20/70/20 x 2 mm U-form
 with screwed cross bars.

Support rollers:

Galvanised steel pipe
 Ø 20 x 1.0 mm with
 ball bearings

Curves:

- Interior radius 800 mm
- Support rollers continuous or in multi-split mode.
- Width 200 - 300 mm continuous
- Width 400 mm in 2 elements
- Width 500 mm in 3 elements

Small roller conveyors with support rollers Ø 30 mm

Small roller conveyors

- For transporting/conveying small, light goods.
- Dimensions of the smallest goods: minimum 115 mm at an axle interval of 37.5 mm/min. 150 mm at an axle interval of 50 mm.
- The good must rest on a minimum of 3 supporting rollers.
- The goods' base must be flat.
- The conveyor track must always be wider than the goods.
- A number of conveyors can be combined to form longer lengths (special lengths possible). The supports intervals should not be more than 2 m. If a number of elements are combined supports must be positioned beneath the connecting parts.
- For operation in dry interior areas.
- The load capacity depends on the track width, roller distances and support intervals.

You can plan the conveyors according to your requirements.
Small roller conveyors can be delivered according to your individual local specifications.

Light roller conveyors with galvanized steel support rollers Ø 50 mm

Light roller conveyors

- For transporting goods up to approx. 35 kg each.
- The good's base must be even and stable, or can feature lengthwise bars in the direction of transport.
- The roller conveyor must always be wider than the selected goods.
- The smallest goods must rest on at least 3 roller axles at one time.
(axle distance x 3 = minimum length)
- A number of tracks may be combined to form a longer lengths (special lengths possible).
The supports intervals should not be more than 2 m. If a number of elements are combined supports must be positioned beneath the connecting parts.
- For operation in dry interior areas.
- The load capacity depends on the track width, roller distances and support intervals.

You can plan the conveyors according to your requirements.
Light roller conveyors can be delivered according to your individual local specifications.

Lateral guides

Galvanised C-form,
28 mm wide on stop bars,
up to 100 mm height-
adjustable

Lateral guides

Galvanised U-form,
20/70/20 2 mm,
guide height:
60 mm with support
rollers Ø 50 mm

Profile cover

Plastic profile, black

Must be installed on
site and adjusted to
length if necessary.

End stop

Galvanised steel sheet
screwed at track end

Supports

- for local fixed assembly
- Square pipe construction,
telescopically extractable
insert feet
- inclinable swivel joint for
setting the track angle
- Laquering RAL 5015 blue

Medium-heavy roller conveyors with galvanised steel support rollers Ø 50 mm

Medium-heavy roller conveyors

- Medium-heavy roller conveyors are the ideal addition to areas where light conveyors would be too weak and heavy duty conveyors oversized.
- The conveyors' support strength is, according to its type (division, width, support intervals) up to 150 kg/m.
- The roller conveyor must always be wider than the selected goods.
- The smallest goods must rest on at least 3 roller axles at one time.
(axle distance x 3 = minimum length)
- A number of tracks may be combined to form a longer lengths (special lengths possible). The supports intervals should not be more than 2m. If a number of elements are combined supports must be positioned beneath the connecting parts.
- The conveyors are combined by means of the supports.
- For operation in dry interior areas.

You can plan the conveyors according to your requirements.

Medium heavy roller conveyors can be delivered according to your individual local specifications.

Sliding belt conveyor for weights up to 15 kg/m

Sliding belt conveyor

- Belt conveyor for transporting light goods with max. weights of 15 kg/m.
- The actual estimated conveyor support capacity depends on the belt width and track length.
- Sliding belt conveyors can be designed as up or downhill conveyors in order to reach high or lower lying work areas.
- A large number of differing types of belts allows individual matching to the intended goods.

Note: please always state conveyor belts. Please inform us:

- type, properties and weight of conveyed goods and operational conditions
- Transport speed (standard: 0,3 m/sec constant)
- Assembly height (supports are accessories)
- electr. elements are also accessories. The basic version only includes the drive motor.

Length mm	Need of support pcs.	Belt width 100 mm	Belt width 150 mm	Belt width 200 mm	Belt width 250 mm	Belt width 300 mm

Frame:

bent stainless steel

Conveyor belt:

single layer polyester material with PVC covering

Drive:

AC-current drive motor 230/400 V 50Hz, IP 54 in transport direction, left, with roller chain on the drive drum Ø 55 mm

Transport speed:

V = 0,3 m/sec. (standard), uni-directional, alternative speeds possible – also optionally adjustable (accessory)

Supports:

Steel square pipe construction.
Laquering RAL 5015 blue.

Supports must be ordered separately.
